To Whom It May Concern:

It is an honor to write a recommendation letter for Mr. Nguyen Minh Thai. As a lecturer at Center of Excellence, University of Science and Technology, University of Danang, I instructed Mr. Thai in several classes; especially, I chose him as a teaching assistant. He proved to be an ambitious and highly motivated student with all the qualities necessary to pursue further studies in a master program.

Mr. Thai was a great student who immediately made a strong impression in classes. I taught him in the courses such as “introduction to differential equations”, “linear algebra”, “advanced multi-variables calculus”. I quickly noticed that he was an especially motivated and enthusiastic student, as he actively participated in discussions with valuable contributions that showed a devotion to learning. As he progressed, Mr. Thai showed that he was able to grasp complex ideas with ease when dealing with sophisticated subjects. He was also a very hard-working and inquisitive student as he always tried to understand the lectures by referring to other textbooks, papers. I had many interesting discussions with him relating to my lectures and he made me surprised by his knowledge and inquisitive fever. Due to his academic background and his performance in the classroom, I can confidently recommend him for your master program, as I believe that he will continue to perform at this high level.

I found that, in addition to excelling academically, Mr. Thai can show his unique abilities and responsibility in research activities. He offered all the qualities of a good leader, and all the characteristics desirable in an ideal team member. He ran my teaching assistant hours successfully for two years. During this period, he used his excellent management and organizational skills for building strong contents and surveying theory, which were needed for the project. Besides, when faced with challenges, he confronts them and brings unique viewpoints that help students in his classes understand the materials well.

In brief, Mr. Thai is a highly motivated student with an intellect and a background that have prepared him well for the challenges of pursuing a master's degree. I therefore recommend him to your master program. If you have any questions about Mr. Thai, or about this recommendation, please feel free to contact me.
