To Whom It May Concern:

I am writing to you in support of Mr. Nguyen Minh Thai and his desire to attend your university. Though many students ask me to make this request on their behalf, I only recommend students whom I feel are well-suited for the program of their choice. Mr. Thai is one of those students and therefore, I highly recommend that he be given the opportunity to attend your university.

As a professor of Centre of Advanced in Da Nang University of Science and Technology, I work with many students who have substantial knowledge of both technology and soft skill; However, Thai is one of the student I thought he will be suitable properly to follow the program in your university due to his characteristics and studying background such as: being hungry always with the management skills as well as working well with international students because of his English ability and volunteer activities.

I first met Mr. Thai in my Signal Processing course during the summer season, 2015. Compared to the class average of 13ECE, Mr. Thai earned the highest grade in the class. Mr. Thai was evaluated on social activities and soft skill also, in which he performed exceptionally well.

In addition to his coursework, Thai also dedicated some of his time volunteering at Junko Non-Government Organization. His position required him to make a plan and operate all the club events. He felt volunteering was an important leadership role, in which he learned the way how to manage his time in a best way, as well as the way how to make a proposal for some donation/support for the events. The skills acquired through volunteering will be beneficial to all of his future endeavors. Thai has the ability to manage and organize his time and schedule around different activities without having them interfere with school. He also won 2<sup>nd</sup> prize of the faculty competition in making English videos for sharing experience in learning English for younger learners in my department.

I believe Thai is destined to be a leader in research career, and therefore is an excellent candidate for your school. I highly recommend that you consider his application, as he will be a great asset to your program. I'm sure you will find him to be a student whose talents will only shine further through your graduate program. It is my hope that you will accept his admission to your university. If you would like further information, please feel free to contact me.

Sincerely,

Pham Van Tuan
